GOP Next Steps for the Red Team: 2 year playbook

Two questions I want to discuss with you regarding the future of the GOP:

**Question one:**

**Will our country continue to strive morally?**

Donald Trump is inflaming the culture war like no other President in recent history - and frankly this is good news for our country.

Good News because in the 1960s, the Left declared 3 Wars on our culture, our society got lost:

and today, by God's mercy - we have a chance to turn things around, hopefully without too much pain.

Page 2

1. War on religion which scrubbed our schools of all references to God weakened our public institutions and opened the door to a Culture of meaninglessness.

2. War on marriage through a feminist movement weakened women and opened the door to a Culture of materialism.

**After two generations of a sexual revolution,**

**Marriage has collapsed.**

**Marriage rates have dropped from 75% of adult population in the seventies to 45% today.**

**For blacks:**

Adult Marriage rates from the 70s have dropped in half - to 30 percent today.

**Conjugal marriage is the capstone of Civil Society and as result of its unraveling,**

**Our public square is in chaos.**

- Out of marriage birth rates have soared.
- Sexual and gender matters are now dividing us: and bringing into question the very premises of public morality and limited government.
- Abortion has deeply hurt us: and questioning the very premises of humanity and its 14th amendment protections.

(68 million dead in 45 years should give all of us all great pause.)

3. War on poverty weakened traditional family and opened the door to a culture of entitlement.

**This concept of redistribution of wealth to alleviate poverty**

**Page 4**

**has not only violated private property rights -**

An absolute principle of freedom

And violated the Scripture:

Don't Covet.

**Wealth redistribution under the guise of Social Justice has violated the very social structures needed for one to excel – and break the cycle of poverty.**

For without Moral Codes of Ethics and a Rule of Law,

Our Society has diminished into a "tragedy of the commons" : a societal order that demands Collectivism and Political Correctness.

**Today far too many Americans are now lost inside of moral relativism and government dependency.**

## Page5

And under the impact of moral relativism and government dependency, our public square has been reduced to secularism and statism.

This new order has gone so far that anyone and everyone who disagrees with it becomes subject to venom of the Mob.

This is why it was critical to have Judge Brett Kavanaugh become Justice Brett Kavanaugh.

Our society must have a rule of law consistent with our founding principles of Christianity, Capitalism and our Constitution to protect those interests.

And this is what the Republican Party is supposed to be about:

To preserve, promote and protect individual liberties of freedom and personal responsibility.

But in many areas we have lost our way.

Page 6

**Question Two:**

**Will our country continue to thrive economically.**

The great struggle we've had between capitalism and socialism has been costly.

**Both Emotional and Economic costs which have taken a toll on all of us as neighbors, and diminished our national morale.**

**The federal government takes 25% of the American economy**

**Which has forced our public square to become a battleground of constant conflict.**

**Economic Cost:**

**Poverty is Big Business:**

(\$22 trillion since war on poverty began.)

Page 7

Federal government spends \$900 Billion Annually on anti-poverty programs. (1/4 of National Budget).

We have reached a dangerous mass of Special Interests who have too much stake in big government --

Whether they are employed by it, collecting benefits from it or businesses getting favors from it.

### **In 1960**

20% of Americans got more from government than they put in.

### **Today**

60% of Americans get more from government than they put in.

Government dependency has seeped into our entire society so we must change.

**The good news is that we can change!**

The good news is that every part of our country untouched by government is going great.

Page 8

The good news is we have a President that understands the principles of business and economic stability so jobs are back!

The good news is that we have a President who understands the dangers and damages of multiculturalism to E Pluribus Unum so discussions of American Exceptionalism are back!

At Stake over next two years:

The left has totally lost sanity (if they ever had any) because their agenda is being exposed by Donald Trump.

Their swamp noise, tolerance noise, gender noise and their race noise are all being confronted by his addiction to Twitter.

In spite of their left wing radical extremism to stop him, under the leadership of President Trump the GOP has realized some amazing accomplishments.

Page 9

1-Internationally, the fact that Israel has right to exist is settled law.

2-Economically, even high school dropouts are making money because jobs are everywhere!

3-Constitutionally, the GOP Senate has confirmed almost a hundred conservative judges to the federal courts.

4-Domestically, every Federal department (with anti-poverty money - one quarter of fed budget) is under EO to look for ways to be more efficient, effective and necessary.

Draining the swamp to MAGA is a reality and the Dems are having temper tantrums!

And they are organizing for political control like crazy mad.

Page 10

Thus, GOP clarity is paramount now that hard core left wing progressives have been elected to our House of Representatives.

The good news is we have a President that inherently understands that our nation is in trouble.

Our job is to insure that he has GOP resolve to keep our country moving forward, towards its reason for existence.

First Step:

Resolve to end abortion.

**Abortion is not salvation; it is crime against humanity:**

**So America should not be doing it.**

**In addition to the moral implications of abortion - and it's mental & medical complications-**

## **Page 11**

Abortion feeds into the narrative of victimhood. As if women have no control over their sexual impulses.

Abortion is at root of why we have family and culture collapse.

### Second Step:

With demographic shift in country to where in 8 years under 30s will be majority non-white, the Republican Party will be reduced to a country club if it doesn't start to specifically engage Americans of color with its story.

Great irony is that President Trump has done a phenomenal job shaping initiatives to address the concerns of people of color.

And its as if GOP either doesn't know it or is afraid to tell it.

It's past time for Republican leaders and donors to get aggressive with our message in our nation's diverse communities.

### **How?**

**Block-grant all Welfare and Entitlement programs to the States: including education policy and housing policy.**

And explain to Americans of color why this agenda serves their interests.

States are where we should be looking for ways to remove barriers to flexibility, mobility and prosperity --

The poor more than anyone need help to get their children out of government schools,

Page 13

and to get themselves from under government healthcare, government housing, government welfare, government wage laws and government retirement policy.

## **Enough cannot be said nor done parental choice in Education!**

This only opportunity that we as a society get to interject ourselves into other peoples' children's lives.

(Not internet controls- China)

(Not entertainment controls -Iran)

Only in K-12 do we as a free society get to direct the culture of our youth.

(Michael Brown vs Simone Biles

Page 14

**All States should be thinking about and working on Creative Experiments and Pilot Programs to transition our nation's poor from government dependency.**

**Third and final step:**

### **Personalize Social Security**

There are particularly important implications to personalize Social Security for poor Americans, and particularly black Americans.

Per the Federal Reserve, in 2016 median black family net worth was \$17,600, about 10 percent of median white family net worth.

Nineteen percent of blacks have zero or negative net worth.

So just as money should follow children to a school their parents want,

Page 15

We could allow Retirement funds to be directed to an IRA if the worker wants.

**Freedom and Ownership is key to breaking a cycle of poverty.**

And to getting buy-in instead of multiculturalism from the folks that today have no stake in America's future.

**The opportunity to Build Wealth is one of the most amazing benefits of our free society...**

**So we need to remove all barriers that force workers to send their potential wealth building funds to the IRS.**

Page 16

In Closing:

As stated in a recent quote in Forbes Magazine:

"You cannot change things by fighting the existing reality:

"To change things you must build a new model to make the existing model obsolete."

The existing model to help our nation's poor is not working.

So I've committed my life to building a new model to make the existing government model obsolete.

I hope you will join me!

Go.Red.Team.
